Spectrum Business Internet®

Deploy flexible broadband for primary or secondary internet connections.

Spectrum Business Internet delivers fast and reliable internet connectivity with the enterprise-level experience you expect. Support your advanced network needs with a broadband connection that offers flexible speeds.

The service enables your organization to provide a cost-effective internet connection with 99.9% network reliability. You can combine Spectrum Business Internet with our high-performance Dedicated Fiber Internet service to fortify business continuity, manage peak demand, offload nonessential traffic and make more efficient use of network resources.

Product highlights

- **Business continuity:** Provides a second internet connection to keep organizations up and running in the event of an internet disruption.
- **Network augmentation:** Complements or supplements fiber networks by providing asymmetrical upload and download connectivity options that can be used for applications with lower bandwidth requirements.
- **Network-isolated internet access:** Delivers internet access separated from regular business traffic for applications like retail point-of-sale (POS) terminals, break rooms or guest access.

Key features

- No speed throttling or bandwidth caps.
- Reliable connectivity to support business applications in the cloud.
- 100%, 24/7/365 U.S.-based support, local technicians and client service managers accountable for issue resolution.
- Connectivity to software-defined wide area networks (SD-WAN) or special routing for better network design.

Bandwidth that grows with your business

Plan	Speed
Spectrum Business Internet	Up to **400 Mbps** download speed / **10 Mbps** upload speed
Spectrum Business Internet Ultra	Up to **600 Mbps** download speed / **35 Mbps** upload speed
Spectrum Business Internet Gig	Up to **1 Gbps** download speed / **35 Mbps** upload speed

Other available services
