Secure Dedicated Fiber Internet for healthcare

Experience reliable internet performance and enterprise-level cybersecurity in one simple and affordable solution

Today's healthcare organizations (HCOs) depend on high-performing internet solutions to keep critical applications running and business operating. Secure Dedicated Fiber Internet from Spectrum Business® integrates a fast, dependable, dedicated fiber internet service with enterprise-level cybersecurity protection in one remarkably simple solution.

Secure Dedicated Fiber Internet provides the confidence you need to focus on better serving patients, providers and staff. Drive productivity and stay ahead of cybersecurity risks with integrated and automated security updates that deliver unmatched simplicity and value. Secure Dedicated Fiber Internet is backed by our industry-leading service-level agreement (SLA) that includes 100% uptime.

Product highlights

- **A combined, secure internet solution:** Benefit from a dedicated internet connection with built-in, enterprise-level security in one simple solution that enables you to effortlessly protect and safely connect your HCO.

- **Ultra-reliable, dedicated fiber internet service:** Get a scalable, high-performance, low-latency, dedicated internet connection with equal upload and download speeds up to 2 Gbps.

- **Enterprise-level cybersecurity:** Features include a next-generation firewall, URL content filtering, advanced malware protection, an intrusion detection and prevention service and more.

- **Fully managed security:** Includes automatic security updates, as well as equipment, installation, configuration, maintenance and 100%, 24/7/365 U.S.-based support.

- **Unmatched simplicity and value:** Receive an all-inclusive service that offers enterprise-grade dedicated fiber internet and security, which we set up and manage for you. There is no equipment to own, configure or maintain and we support you 24/7/365 so you can focus on growing your business rather than worrying about internet reliability and cybersecurity.

Benefits

- **Maximizes productivity** via fast and reliable internet access that ensures consistent connectivity and supports your HCO operations without requiring additional IT resources or extra time to manage services.

- **Provides peace of mind** by securely connecting to the internet while offering a single point of support to quickly resolve issues and a 4-hour mean time to restore service SLA.[1]

- **Effortless technology management** with a single, easy-to-use security solution that eliminates the need for additional in-house IT resources or vendor support, allowing you to focus on operational priorities without increasing complexity and costs.

- **Supports regulatory compliance** to help you meet and keep up with industry-specific data protection and privacy regulations.

- **Supports your future needs** by enabling you to quickly and easily increase bandwidth and integrate services like WiFi.

1. 4-hour mean time to restore service SLA.

Spectrum BUSINESS®

Available services

- **WiFi:** Meet user demands for reliable connections to the internet with ubiquitous coverage across your location.

- **Switches:** Reduce complexity by easily connecting your network-enabled office and medical equipment.

- **Smart cameras:** Monitor access to restricted areas, help prevent theft and gain visibility into patient, provider and staff traffic across your facility with smart cameras.

- **Environmental sensors:** Optimize operations with highly integrable, simple-to-use and reliable environmental sensors. Get automatic alerts about environmental changes like temperature, water leaks and air quality throughout your HCO.

- **Wireless Internet:** Connect to the internet via a wireless solution that helps keep your HCO running with temporary or secondary internet access over 4G or 5G LTE Advanced technology. This all-inclusive wireless internet service comprises equipment, installation and support.

- **Unified communications:** Answer communication and collaboration needs with a fully managed, cloud-based unified communications solution that brings together calling, messaging, meetings, virtual workspaces and more in a single application that delivers a unified experience for your mobile, on-the-go workforce.

Discover how Secure Dedicated Fiber Internet can more easily connect your HCO to the internet without delays and with cyber protection that reduces threats. Experience uninterrupted operations and the speed and reliability you need for providing greater healthcare.
